FIELD VISIT AT PHC

20th April 2022

Venue: PHC, Jategaon, Dist. Nashik

Event Coordinator: Dr. Swati Talele, Mrs. Pallavi Pawar

Committee Members: Dr. Swati Talele, Ms. Chetna shinde, Mr. Nilesh Nikam

Theme of Programme: Field visit of Primary Health Centre, Jategaon.

Time: 11.00am – 1.00pm

All students of First-year D. pharmacy visited the PHC (Primary Healthcare Center) situated in Jategaon village of Nashik district.

Medical officer Dr. Dani sir gave information regarding different sections of the hospital, treatment available, and the role of staff members. He also gave valuable information regarding the future of the pharmacy profession and career opportunities for pharmacy students. A few of the career opportunities available are as a pharmacist and pharmacy officer at the PHC.

Pharmacists at PHC dispense the medicines and keep daily, weekly and monthly records of medicine stock and submit purchase orders for medicines that are unavailable or out of stock.

Students observed various sections and the doctor gave us detailed information about each section.

Sections at PHC:

Office: Daily, weekly and monthly records of patients are maintained here. The clerk is associated with this job.

Computer room: All the paperwork and hospital data are operated by the officer assigned to this position.

Emergency ward: Accident cases, snake bite, dog bite cases, and urgent injury cases are handled here.

Pharmacy: All the drug and medicine dispensing occur here. The patient shows the prescription to the pharmacist and collects the prescribed medicines for him/her.

Pathology Lab: Blood test, urine test, pregnancy test, thyroid test, and HIV tests are done here. For advance tests, the sample is collected and further transported to the Civil hospital of Nashik and the report comes after 3 days of collection.

Patient ward: There are two female wards and one male ward available. The total bed capacity of the PHC is 20 beds.

Operation theatre: some minor surgeries are performed here. For more critical surgeries specialized doctors and surgeons are called to carry out the operation.
