Hence the PCI has decided to celebrate "Pharmacists Day" in order to make the public and health care professionals aware that pharmacists are important members of the health care team, and there is a need to make the best use of their services in order to improve patient's quality of life and the society.

Colleagues from every sector of the pharmacy profession took part in the campaign, including community, hospital, industry, science, education, research and clinical trials, government, regulation and non-governmental organisations, showing the world how we are united for health, regardless of and overcoming conflict, different politics and cultures, and economic disparity.
