Preventive Education: To educate participants on preventive measures and lifestyle practices that contribute to maintaining good eye health.</p> <p>4. Community Engagement: To actively engage with the community, fostering a sense of responsibility towards individual and community eye health.</p>
Outcome of the event	<p>1. Community Collaboration: Enhanced community collaboration with local health organizations and professionals, fostering a sense of collective responsibility for public health.</p> <p>2. Improved Access to Eye Care: Increased accessibility to quality eye care services, ensuring that a larger segment of the community can benefit from specialized eye care.</p> <p>3. Education and Knowledge Transfer: Transfer of knowledge through educational workshops and informational materials, enabling participants to make informed decisions regarding their eye health</p>

Event/Activity Report

SIPS in collaboration with ASG eye hospital conducted awareness camp on the recent eye technology development's and how it will affect the people suffering from eye disorder.

The event proved to be a resounding success , enriching participants with valuable knowledge on the recent developments and the measures of awareness required in conducting the same.

Renowned ophthalmologists delivered engaging presentations covering topics such as laser eye surgery, the role of pharmaceuticals in eye care and emerging technology for early detection of eye conditions.

Real life case studies and success stories were shared illustrating the positive impact of advanced eye care technologies on patient lives.

The last Q&A session also enriched the students with immense knowledge and with no room for doubts.
