Event/Activity Report

On 25th July 2024, an enlightening and informative interactive webinar session was conducted by Department of Higher and Technical Education on information on various scholarship schemes implemented by higher and technical education for the benefit of students. The webinar commenced with a warm welcome by the moderator, emphasizing the importance of scholarships in enabling students to achieve their academic goals. The Hon. Minister provided an insightful overview of the government's commitment to supporting education through numerous scholarship schemes.

He highlighted state government will extend 100 per cent reimbursement of tuition and examination fees for girls pursuing professional courses who come from families having an annual income of Rs.8 lakh, higher and technical education minister Chandrakant Patil clarified that colleges are instructed not to take fees from girls at the time of admissions and that the government will pay the fees in two installments. Colleges have been given clear instructions that no girl should have to pay the fees at the time of admission and that the fee will be reimbursed by the government later. If any college asks students to pay fees upfront at the time of admission, it should be reported to the higher and technical education department,” said Patil as he was interacting with students and other stakeholders in a webinar on Thursday aiming to clarify doubts around the recently announced scheme. He said that the rate of enrolment of girls in professional courses is only 34 percent in Maharashtra as opposed to 64 per cent in case of boys.

Previously, girls from OBC and EWS categories received 50 per cent fee reimbursement, contrasting with 100 percent reimbursement for girls from SC and ST categories. Under the new decision, girls from OBC, EWS, and SEBC categories, including orphans, with annual family incomes up to Rs.8 lakh will now receive 100 percent fee reimbursement. The scheme has been introduced to boost enrolment of girls in professional courses such as medical, engineering, pharmacy among others.
